KARTHIK BINDUMON

Game Producer | Learning Experience Designer | Behaviour-Change Systems
Mumbai, Maharashtra, India | +91-9167756496 | karthik.mbindumon@gmail.com | linkedin.com/in/karthikbindumon11 | solobushido.github.io/portfolio

SUMMARY

Game producer leading a 50+ team at BooBoo Games, with 30+ games shipped across hybrid-puzzle, idle arcade, idle tycoon, rewarded, AI-based interactive narrative and client titles, at a cost per install under $1.50 on hybrid-puzzle. Moved Funcell Games to an AI-first studio: AI workflows for every stage of development, from 3D assets to QA and UA. Google-certified project manager and co-founder of three studios. Designs training, onboarding and product experiences on game-design and behavioural-science principles, each with a measurable target agreed before the build.

CORE COMPETENCIES

Production and product	Game production, project management, product design, studio operations and integration, live-ops, creative and playable-ad pipelines, user acquisition
AI production	AI workflows for 3D asset generation, rigging, animation, sound, QA and data-led game improvement; internal AI tools; always-on compute pipelines
Design	Game design, systems and economy design, gamification, learning experience design, UX/UI, AR/VR, toy and physical-object design
Behavioural science	Neuroscience of reward and habit, memory and spaced practice, motivation psychology, decision science, anthropology of ritual, group behaviour
Tools	Unity, Unreal Engine, 3D visualisation tools, Android development, AI-based production tools, LaTeX
Certifications	Google Project Management, Google Prompt Engineering, Gamification: Motivation Psychology, Diploma in Basic Game Development

PROFESSIONAL EXPERIENCE

Game Producer | BooBoo Games

April 2025 to present

- Leads a 50+ team of designers, developers, artists and editors across simultaneous projects.
- 30+ games shipped: hybrid-puzzle, idle arcade, idle tycoon, rewarded, AI-based interactive narrative and client titles. Personally built 5+ 3D PC games and 10+ mobile games.
- Cost per install under $1.50 on hybrid-puzzle titles through data-driven design and rapid iteration.
- Client work: rewarded games for European clients; web games for six-plus clients, including TikTok.
- Merger with Funcell Games: moved people, operations, workflows and tools into the combined studio. Then moved the studio to an AI-first model.
- Built the AI workflow for each stage of game development, with specific tools and skills for QA, game improvement from live data, and full 3D game development (asset generation, rigging, animation, sound), so one developer can carry a game end to end.
- Built internal AI tools that keep compute working day and night, without the person at the desk.
- Built, single-handedly, the workflow for creative and playable-ad development and publishing.
- Built a curated UA tool and dashboard that sets the acquisition strategy for each game and adapts to ad spend and MMP data.
- Led developers to build games with 100+ levels in a single day. Ported 6 Steam games to mobile in 5 days through the 3D workflow, with cost held down.
- Interactive microdrama platform: streamlined the production workflow for 25+ stories; coordinated AI-based internal tools.
- Mentors junior designers in game design, production practice and cross-team collaboration.

Co-Founder, Product Designer, Project Manager | Dinelift

November 2022 to present

- Validated a gamified outdoor-dining product with 50+ daily sales calls into the hospitality sector before development.
- Designed the app around user engagement and retention.
- Built the technical team from the ground up; recruited and onboarded full-stack mobile developers.

Co-Founder, Product Designer, Project Manager | Papertoy Studio
January 2022 to present

- Developing a gamified holistic fitness application built on behavioural psychology and game mechanics.
- Classified 3D stealth visualisation project (CLAW INDIA) in collaboration with Indian Special Forces veterans.
- Client relationships with 150+ executives across construction, interior design and defence.
- Led 3D specialists producing photo-realistic gamified visualisations for architecture and design clients.
- Designed an AR sign-language application for hearing-impaired users.

Co-Founder, Game Designer, Project Manager | Nerdy Quest
January 2022 to present

- Developed and published 12+ Android games across five genres, concept to launch.
- Design consultancy and project management for Fanclash Game Studios on multiple titles.
- Recruited, trained and mentored junior game developers; built a scalable talent development programme.
- Partnerships with 150+ clients across the Indian film production and distribution industry.

Game Designer, Gamification Consultant, Tutor | Freelance
November 2021 to present

- Mentors students in design principles grounded in psychology, neuroscience and user experience.
- Consults on gamification for customer acquisition, retention and real-world problem solving.
- Leads 3 to 5 person teams building game prototypes; owns design documentation and production workflow.

Content Writer | Sportskeeda
November 2024 to January 2025

- Authored 200+ mobile gaming articles and listicles, 50,000+ views, SEO-led.

Game Tester | Expleo Group
March 2019 to April 2019

- QA on iOS for visual novel and action RPG titles; around 10 bug submissions a day.

EDUCATION

- Toronto Film School, Diploma in Video Game Design and Animation, January 2021 to June 2022
- Seamedu School of Pro-Expressionism, Bachelor of Fine Arts in Game Design and Game Art, 2018 to 2019
